IMPORTANT INFORMATION

- Please read this manual carefully before using the air fryer. This manual contains important information concerning your safety, as well as recommendations on the correct operation of the unit and its maintenance.
- Please use a separate electrical outlet, do not share the plug with other electrical appliances.
- Do not use on an uninsulated table or place a heating pad under the product before use.
- This product is for household use only.
- For the first use or when the glass pot cools down, you can preheat it for better effect.
- Do not touch the glass cooker when cooking.
- Food should be placed on the rack and not block the air duct.
- When cooking, do not add water or other non-ventilated/non-temperature resistant utensils (such as plastic) to the glass cooker, so as not to affect the cooking effect.
- After use, immediately unplug the power cord.
- Please unplug the power supply and wait for the product to cool down completely before cleaning.
- Do not clean the machine directly with water, you can use a soft wrung out cloth to wipe off stains, do not use alcohol or abrasive and/or volatile substances to clean the product.
- When the product is working, the distance between the product and the wall must be more than 10cm.
- If you find the product has abnormal noise or strong vibration during use, please turn off the power first, and then contact the authorized center for check and/or repair.
- Do not use a damaged power supply or plug to avoid electric shock and fire.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge (including children) unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- If the power cord is damaged, it must be replaced by professionals such as the manufacturer and its service department.

RECOMMENDATIONS

Note: The fryer has a reminder alarm, which will sound 3 times to turn the food. At the end of the cooking cycle the alarm will sound 3 times, indicating that your food is ready for consumption.

At the end of the cooking cycle, the unit is in standby mode, you can remove the glass container and place it on a heat resistant surface. We recommend that when the product is not in use, unplug it from the electrical outlet.

IMPORTANTE

1. For precaution and safety, **DO NOT** touch the glass container while it is cooking, you may suffer burns.
2. Be careful with the air outlet and steam discharge to avoid burns.
3. Product should be kept out of reach of children; they may suffer burns if they come into contact with the glass container.

CLEANING AND MAINTENANCE

Note: Wait until the glass container cools down before cleaning.

1. Before cleaning, disconnect the power cord from the outlet.
2. The glass container and rack can be washed in an automatic dishwasher.
3. Please avoid bumping the glass basket during the cleaning process.
4. After washing, you can dry the glass container and rack with a dry cloth.

FAILURE ANALYSIS

FAILURE	
Smoke and odors when using the product for the first time	When using for the first time, use for 5 minutes without food, so that the film that protects the internal parts evaporates.
Product does not work	Check if the product is properly connected to the outlet, or if the glass container is correctly placed inside the device.
Product does not heat	Check if the power button is on, or if the carbon fiber heating tube is illuminated.
	The heating tube does not illuminate, please contact after-sales service.
Broken glass container	Please contact after-sales service

If you have any problems during use, please contact our after-sales service.

In case your glass container breaks, keep the handle screws, they are indispensable.
